Abstract (en)
[origin: WO2008113816A2] A glove comprising an element shaped as a hand to form the base structure of the glove and a cladding applied to said base element in at least one gripping region on its palm, said cladding presenting a plurality of micro-craters each formed of a material which enables it to at least partially deform when subjected to a force and to return to its original shape when said force ceases, said micro-craters increasing the friction and to at least partially dampen any impacts or vibrations by said deformation.
