Abstract (en)  
[origin: WO2008139051A2] The invention relates to an electrical hairbrush (1) including a longitudinal housing (2) defining a gripping handle (3), a heating member (5), a first motor (6) for driving a fan (7) for circulating air from an air intake opening (9) located at one end of the handle towards an air outlet opening (10) located at the opposite end of the handle, and a second motor (14) for rotating a hairdressing accessory (11), characterised in that the fan (7), the first motor (6) and the heating member (5) are contained within the handle (3) and in that the second motor (14) is connected by at least one rod to the outside of the handle (3) in the same direction thereof while being coaxial or parallel to the longitudinal axis of the handle, the base of the rod being attached to the handle (3) and having a front extension in the form of a holding portion for the second motor (14).
