Abstract (en)

[origin: WO2008077644A2] The invention relates to a mobile lighting device for tweezers (6) comprising two tweezer jaws that are joined together at one end (15). The lighting device encompasses a light source (5) and a wire (4) which can be mounted on the tweezers (6) and allows the light of the light source (5) to be directed or conducted to the location where the tips of the tweezers (6) are to seize an object. The mobile lighting device further encompasses an adapter piece (1) which can be clampingly plugged onto and be removed again from the end (15) of the tweezers (6) that joins together the tweezer jaws.
