Abstract (en)
[origin: GB2447468A] A bath support (10) for a babies and infants (40), comprises a support component (14) having a base part (30), and a support part (32,34) upstanding from the base part and adapted to limit movement of the baby or infant seated on the base part. A securing component (12) in the form of non-slip mat (16) surrounds the support component (14) and covers and overlaps its base part (30) so as to contact the bath and adhere thereto by means of suckers on its undersurface. The support parts (32,34) pass through apertures (42,44) in the mat (16).
