Abstract (en)
[origin: DE202007004392U1] The device has a plastic cover (28), and a set of brush heads (14) provided with bristles (16). The cover comprises a passage opening (30), and each brush head is fixed to the cover. The bristles are oriented in a direction of an axis (40) that cuts the opening. The brush head is variably positionable relative to the axis, and the cover comprises a fixing module that is arranged peripheral to the opening. An independent claim is also included for an arrangement for cleaning an agitator.
