Abstract (en)  
[origin: WO2008129216A2] The invention relates to a portable lighting device (10) that includes a power supply housing (12); a lighting head (16) comprising at least one light source; a linking arm (18) linking the housing and the head; a holding member (20) of the lighting head; the latter being mobile relative to the housing (12) between a first position in which the head (16) is close and/or secured to the housing (12) and a second position in which the head (16) is distant and/or not secured to the housing (12), the holding member (20) being secured to the housing (12) and fitted to maintain the head (16) in a fixed position relative to the housing (12) in the first position of the head. The holding member (20) includes a mobile element (126) relative to the housing (12), adapted to hang the housing (12) on an external mounting (122).
