Abstract (en)
[origin: WO2008121639A1] A storage system is provided that includes a memory controller for controlling a throughput rate for utilizing digital content by an accessing system, wherein the throughput rate is associated with information related to the digital content stored as a file. Also, a system for utilizing digital content is provided. The system includes an accessing system for utilizing the digital content, wherein the digital content is released to the accessing system at a controlled throughput rate and the throughput rate is associated with information related to the digital content stored as a file.
