Abstract (en)

[origin: EP2133256A1] The system (10) has central computers (16) for managing a train or rail transit car (12), and remote input-output modules (20) connected to a multipurpose vehicle bus network (14). Electronic controlling, commanding and monitoring equipments produce information for managing the train or rail transit car. Display units (18) process and display information produced by electronic automatic train control equipments (30) and video monitoring equipments i.e. CCTVs (36), with the information produced by the computers and the electronic controlling, commanding and monitoring equipments.
