Abstract (en)

[origin: EP2133287A1] The method involves sucking trash (6) into a chamber (2) by a flexible hose (9). The trash is brought into the chamber from a ceiling (3) through an extending connection (7). The trash is brought into the chamber from the ceiling in a diagonal manner. The air from the chamber is sucked out. The air is guided through a filter (21) after sucking out from the chamber. An independent claim is included for a device for emptying trash can, particularly of trash can, which is buried in ground.
