Abstract (en)

The gutter element (10) has a seepage inlet section (16) lying below a main inlet section (12) in an assembled condition of the gutter element. A flange (30) i.e. adhesive flange, is provided at a side of the gutter element at a height of the seepage inlet section, and has a recess for retaining a flat bar, where the recess has curves at edges. The seepage inlet section has a gap towards a seepage opening (18) in the assembled condition of the gutter element, which is made of polymer concrete or concrete or stainless steel.

Abstract (de)

Die Erfindung betrifft ein Entwässerungsrinnenelement sowie eine Entwässerungsrinne mit mindestens zwei Entwässerungsrinnenelementen.
