Abstract (en)

[origin: EP2133480A1] The method involves determining a screwing point and the solid angle of a screw (20.1,20.2,20.3,20.4) in two wooden components (10.1,10.2). A guide bore is provided at the screwing point under the solid angle before screwing the screw. The length of the guide bore is short in comparison to the contact length (L) of the screw.
