Abstract (en)

[origin: WO2008108651A1] The invention relates to food compositions, such as infant food and dietary supplements for children. In particular, it relates to infant foods which have a favorable effect on the cognitive skills of a child. The invention provides a method for selecting an infant food which contributes to the development and/or use of the cognitive skills of a child, comprising determining the age of the child and selecting a food optimal for that age, wherein, for an age of 1 year at most, an infant food with a tryptophan : tyrosine ratio based on weight (T/T ratio) of = 0.3 is selected and wherein, for an age from 1 year, an infant food with a T/T ratio < 0.3 is selected.
