Abstract (en)

[origin: WO2008125473A1] The invention relates to a water-conducting appliance, particularly a household dishwasher (2), comprising a line system and a cleaning agent feeding device (18), which is configured to feed at least one cleaning agent into the line system of the household dishwasher (2) and comprises at least one reservoir (16), which can be filled with a cleaning agent. The invention is characterized in that a refill fitting (20) connected to the reservoir (16) is provided on the door (24).
