Abstract (en)

[origin: WO2008113548A1] The invention is based on the aim of providing a novel office tool, and a corresponding method, wherein various application advantages of known office tools are combined. The invention provides an adhesive tape stamp 1 that is configured to implement a course of movement, wherein an adhesive tape section having a defined length is pressed onto an object in a stamping device, having a separating device 12, which is configured and/or disposed in order to separate an adhesive tape end as the adhesive tape section 23 from a continuous adhesive tape 19 at a separation point 22, and having a stamping device 11, wherein the stamping device 11 is configured and/or disposed to press the adhesive tape end and/or the adhesive tape section 23 onto the object in the stamping direction 4.
