Abstract (en)

[origin: WO2008124795A1] Methods, software, devices, and systems, for wireless interaction with control systems (e.g., control systems integrated with motor vehicles, commercial and/or residential buildings, appliances, or other complex integrated systems). The methods generally include establishing a first wireless communication channel between a handheld communication device and the control system and establishing a service provider communication channel between the handheld device and a service provider. The service provider communication channel generally includes a second wireless communication channel between the handheld communication device and a wireless communication provider node.
