Abstract (en)

[origin: WO2008101990A2] The invention relates to a switch arrangement for a motor vehicle, comprising at least one toggle or sliding switch, which has a switch housing and a switch lever, wherein the switch lever can be tilted or displaced perpendicular to the axial extension thereof, further also an actuating button, which is connected to an end section of the switch lever, and at least one pushbutton switch, wherein the actuating button forms the housing for at least one pushbutton switch.
