Abstract (en)
[origin: WO2008125314A1] The invention relates to an electrical interconnecting module (1) comprising a connection (20) for a data cable and a plurality of electrical contact elements (5) via which an electrical and/or electronic connection to a corresponding number of mating contact elements of a terminal block (2) can be established, said terminal block being configured as terminal screw connections (4) The invention is characterized in that the electrical contact elements (5) of the interconnecting module (1) are configured in such a manner that a direct electrical and/or electronic connection to the mating contact elements of the terminal block (2), which is configured as terminal screw connections (4) can be established via the contact elements.
