Abstract (en)

[origin: WO2008110245A1] The invention relates to a 19" design control box (1) for receiving insertable and extractable electronic system components (3; 3 a, 3 b), comprising a housing formed from vertical and horizontal profile beams (12, 13), and lateral walls, a base, a cover wall and a rear wall or rear door in addition to a front door that are secured thereto and an air-conditioning device (4) that is operated by means of ventilators (5) and by circulating air for cooling the system components. Said air-conditioning device (4) is arranged, on the base side, below the system components (3; 3 a, 3 b) and a cold and a hot channel (8, 9) are embodied towards the front side or the rear side.
