Abstract (en)

[origin: EP2135666A1] Pharmaceutical product administration involves subjecting pharmaceutical product and a portion of application liquid-contained container (1), preferably syringe, particularly Luer-lock syringe to an ultrasonic bath. The container walls are permeable for ultrasonic sound. The syringe has a volume of 10-20 ml. Independent claims are included for: (1) a syringe for administering pharmaceutical product, which comprises an impact body; and (2) a container for the ultrasonic bath, which comprises a cover having multiple insertion holes.
