Abstract (en)
[origin: EP2135791A1] The vehicle (1) has a railcar body (2) extended in a driving direction (F) from a rear end to a forward end (E). A driver's cab (3) with a direct outer door (4) is formed in the body. The outer door comprises a door wing (5) pivotable around a virtual rotational axis (X3) in the cab from a closing position into an opening position. A door opening provided at the body is closed in the closing position. The door opening is pivoted around a maximum opening angle in the opening position of the door wing. The rotational axis is arranged in the driving direction before a center of the opening.
