Abstract (en)

[origin: EP2135832A1] The elevator brake has an operating unit, which presses a friction pad (4) against an elevator rail (6) or an elevator brake disk by an operating element (7). A release device (24) is arranged on the opposite side of the operating unit of the elevator rail or the elevator brake disk, and acts on another friction pad (5). An independent claim is included for an elevator system.
