Abstract (en)

[origin: EP2136029A2] The profile (4) has a body (7) made of plastic with hollow chambers (8-10). A reinforcing body (11) made of metal is arranged in the body (7) and equipped with two longitudinal-sided walls (12) and two front-sided walls (13) as a rectangular profile. The body (11) is laminarily placed at two oppositely lying outer profile walls (14, 15) of the body (7) over the walls (12). The body (11) is placed at the other two oppositely lying outer profile walls (16, 17) at a certain degree of play over the walls (13). The body (7) has thermal linear expansion coefficients larger than that of the body (11).
