Abstract (en)
[origin: WO2008130304A1] The invention relates to a modular machining system comprising a fastening unit (4), a column (10), a feeder housing (12), and a drive unit (14), where the drive unit (14) is arranged to drive at least one machining device (16, 55, 62) and where the machining system (2) comprises means arranged to drive the drive unit (14) in relation to the feeder housing (12) to perform a feed movement for the machining device (16, 55, 62). The invention also relates to a feeder housing (12) and a drive unit (14) for a modular machining system (2), respectively.
