Abstract (en)
[origin: WO2008118077A1] The present invention relates to a goods container for loading spaces in vehicles, preferably in aircraft, which goods container comprises at least one goods storage space for the loading, storage, transport and unloading of goods. With a view to achieving a goods container which allows optimum utilisation of the loading space of a vehicle, preferably of an aircraft, the goods container has at least one sidewall (1, 2, 3 and 4), a bottom (5) and a top (6) made of non-self-supporting material which delineate the goods storage space, and also a loadbearing structure (7) which maintains the sidewalls, the bottom and the top made of non-self-supporting material so that they delineate said goods storage space, and the non-self-supporting material is disposed in the bottom (5) of the goods container in at least two, preferably three or four, layers.
