Abstract (en)

[origin: WO2008128533A1] The invention relates to an auxiliary device for equipping the main boom (5) of a mobile crane with an auxiliary boom (3), wherein a support (8, 9) is mounted near the head of the main boom, by means of which the lifting cable (14) of the main boom may be run to a connection point on the auxiliary boom. The invention further relates to a method for equipping with an auxiliary boom.
