Abstract (en)

[origin: WO2008128818A1] The invention relates to liquid detergents or cleaning agents stable for transport and storage, having a flow limit, containing photo-catalytic material and a thickening system. The detergents or cleaning agents enable a cleaning, care, finishing, softening, and/or conditioning of textiles using light at a wavelength range of 10-1200 nm. They also enable a cleaning of hard surfaces using light at a wavelength range of 10-1200 nm.
