Abstract (en)
[origin: WO2008142221A2] The invention relates to a handle for a spreading knife, usable by hand and also by an extension sleeve permitting an even application of the coating whilst limiting the effort of application. According to the invention, a spreader knife handle (100) comprises a grip section (10) connected by a central part (20) to a part (30) for fixing at least on spreader blade, characterised in that the holding part (10) has an upper face (1) connected to the central part (20), by a front convex grip face (2a) connected to a concave grip surface (2c) at the front of the central part (20) and by a lower face of a rear arm (3a) connected to a concave arm face (3b) at the back of the central piece (20).
