Abstract (en)
[origin: WO2008114919A1] Provided is a pipe probing method for an air conditioner. The pipe probing method includes probing indoor unit groups, to which respective dispensers are connected, by operating the indoor unit groups connected to the respective dispensers one by one and detecting the indoor unit group that is operating, and probing pipes of the dispensers, to which the indoor units are connected, by operating the indoor units of each indoor unit group one by one and detecting the indoor units that are operating.
