Abstract (en)
[origin: WO2008125369A1] The invention relates to a pendulum laser device (1) having a housing (2) with at least one contact surface (8, 20) and with at least one laser beam (6)-producing laser beam source (5) which is attached to a pendulum (4) mounted in a manner allowing pendulation. According to the invention, at least one scale (10, 14, 24) is incorporated in the housing (2), by means of which the deflection of the scale (10, 14, 24) can be determined and thereby the deflection of the contact surface (8, 20), to the vertical and/or the horizontal.
