Abstract (en)

[origin: CA2683345A1] The invention relates to a locking device to prevent the unauthorised activation of an installation switch device, the switchgear of which can be moved from a latched condition into an unlatched condition by means of a trigger lever with a trigger lever actuator piece which may be operated from outside the switchgear between an on and an off position, wherein the trigger lever actuator piece is coupled to the trigger lever in the off position and holds the trigger lever in the latched condition thereof in the off position.
