Abstract (en)
[origin: EP2138213A1] The ride has a vehicle movable along a driving route, and an element e.g. partially transparent glasses, on which a recorded image is formed. A recording device records optical reality perceivable from the vehicle, and the vehicle has an impression generating device for generating visual impressions, which change reality perception. The impression generating device is formed such that an overall image comprising the recorded image and additional visual impressions imported and/or mixed and generated by the impression generating device.
