Abstract (en)
The item (1) has aesthetic elements (3) such as enamel, integrated to a support (2) by inlaying through hot forming, where the support is made of amorphous material. The material has viscosity to permit the material to interfere into recess for the solid fixation of the aesthetic elements into the support. The aesthetic elements are semi-transparent to permit visualization through the item. The support has a cavity in which the elements are inlaid, where the cavity has vertical and inclined sides.

Abstract (fr)
La présente invention concerne une pièce décorative (1) comprenant une première (2) et une seconde partie (3). La seconde partie (3) est solidarisée dans la première (2) par incrustation. L'invention se caractérise par le fait qu'au moins l'une des parties (2, 3) est réalisée en matériau au moins partiellement amorphe.
