Abstract (en)
[origin: EP2138415A1] The envelope (1) has a sheet (3) assembled with another sheet by welding on two of longitudinal edges (4, 5) and transversal edges (6, 7) for forming a closed inner volume, where the sheets are made of flexible plastic material. An opening (9) provides access to the inner volume, and is totally covered by a closing system i.e. security adhesive (13). Each edge of the envelope comprises a weld (8) having a progressive width and/or an outer side or an inner side with a progressive localized direction.
