Abstract (en)

[origin: EP2138436A2] The device (1) has a curved centering, width adjusting and/or aligning roller (2) provided for conveying a moved textile material web and comprising elastic connection belts e.g. expander belts, where the belts are axially movable along a longitudinal axis of the roller. The roller has an elastic lining having guiding grooves that are formed for guiding the belts along the longitudinal axis. Deflection rollers for supplying and/or removing the material to and/or from the roller (2) are supported around a rotational axis in a rotationally movable manner. An independent claim is also included for a device for centering, width adjusting and/or aligning of a textile material web.
