Abstract (en)

The wall has two wall elements (10, 20) arranged adjacent to each other around an angle. The wall element (10) stays in contact with the wall element (20) by connecting edges (11, 21), which are arranged parallel to each other. A connection element (1) is fixed at front sides (12, 22) of the wall elements by a fastening unit (2) such as screw, nail or threaded rod. The connection element is made of a metal, and is provided with a borehole (3) for receiving the fastening unit. The wall elements are designed as frame element or plate element.

Abstract (de)
