Abstract (en)

[origin: EP2138763A2] The spotlight has illumination heads (2, 2', 2'') provided with light sources i.e. halogen lamp, which comprises of LEDs. A housing (4) has a receiving space for an operation device for electrical supply of the light sources, and another receiving space for receiving the illumination heads. The illumination heads are supported in the latter receiving space such that the illumination heads are movable between an operating position lying within the receiving spaces, and another operating position. The illumination heads are held in the former operating position via pins.
