Abstract (en)

[origin: WO2008116429A1] The control level (CONL) is connected by at least one external data link (EDL_A, EDL_B) to the executive level (EL), which contains at least one executive device (ED), which has three basic parts, being the control part (CP) made up for at least one control computer (CC), the executive part (EP) made up for at least one executive component (EC) and the supply part (SP) made up for at least one source (S). The control part (CP), executive part (EP) and supply part (SP) are mutually connected by at least one internal data link (IDL_A, IDL_B) for the executive device (ED).
