Abstract (en)

[origin: WO2009000342A1] The invention relates to a closure cap (3) made of plastic for the pouring spout (2) of a container, having a tamperproof strip (5a, 5b) which is arranged along the bottom cap edge (4) and is connected to the cap via at least one tear-off web (8), wherein a first end (6) of the tamperproof strip is fastened in a non-releasable manner on the cap and the second end (7) is fastened on the cap via the tear-off web, and wherein, when the cap is screwed open, the second end of the tamperproof strip comes into abutment against a protrusion (10), in particular a step of the spout (2), by means of which the tamperproof strip can be buckled and the tear-off web can be severed.
