Abstract (en)
[origin: WO2008128868A1] The invention relates to an apparatus for the cleaning of a continuously circulating belt (2) of a machine for the production and/or finishing of a paper, carton, or other web. Said apparatus has a cleaning unit (3) for the release of at least one cleaning jet (4) in at least one cleaning section (16). According to the invention, at least one additional unit (6) is provided for the release in a preparation section (15) of a chemically or physically active agent (8) which supports and/or improves the cleaning effect of the cleaning jet (4) and/or prepares the cleaning.
