Abstract (en)

[origin: FR2913994A1] The frame has a closed caisson shape central part (10) with double walls (10a, 10b) whose external peripheral shape is adapted to a pre-existing guard shape. A space between two walls is partially filled with an insulated material. A chimney shape part (11) is extended on all thickness of the central part (10), where the part (11) has a diameter adopted to receive a light lamp (6). A peripheral fixation unit (8) is provided at the peripheral of the central part and adapted to a guard (1).
