Abstract (en)
[origin: WO2008128518A1] Disclosed is a sliding door for cold stores, particularly deep-freeze stores. Said sliding door ensures good sealing towards the frame while preventing damage when driving too fast through the not fully open door. In order to do so, at least one door leaf (2, 3) of the sliding door for cold stores is provided with at least one rigid (4) and at least one flexible (5) area.
