Abstract (en)

[origin: WO2008113564A1] The invention relates to a disk brake caliper bracket (7) that can be screwed to the axle flange (9) of a motor vehicle, especially of a utility vehicle, and that has throughbores (6) through which connecting means (13) can be led for connection to the axle flange (9). Said brake caliper bracket is configured in such a manner that the throughbores (6) are located on a perforated concentric graduated circle (5) of a connecting flange (10) formed thereto.
