Abstract (en)  
[origin: WO2008131890A2] The invention relates to the arrangement of a sheet resistor (chip) in an exhaust pipe or exhaust gas recirculation pipe. The sheet resistor is mounted in a support which is sealed from a shield or a housing that is tightly connected to the exhaust pipe or exhaust gas recirculation pipe. The support and the shield or the housing are sealed from one another radially outside the exhaust pipe or exhaust gas recirculation pipe, at a distance therefrom.
