Abstract (en)

[origin: WO2008119324A1] The invention relates to a device for measuring and displaying one or more than one component amount in a container, such as of a component mixture that is to be blended. The device comprises a base plate, on which the container is placed, and a graduated device for measuring and displaying a component amount in the container, said device having more than one graduated device and/or the graduated device having more than one gauge. The graduated devices and/or gauges are fixed but also displaceable on the device.
