Abstract (en)
The method involves providing a free rear binding, and back-rounding a book block. The book block is rounded at a rear side and/or a front side by a mechanical material removal by cutting. The book block is provided with a rear glued bond at the rear side. A side glued bond extends from sides of the book block. A rear lining is applied on the rear glued bond. The book block is glued with the lining and/or with a flap using polyurethane, ethylene vinyl acetate base and acrylic base. The flap is made of paper, plastic or fabric. An independent claim is also included for a book comprising a bind cover.
