Abstract (en)

The invention relates to a box, comprising a bottom panel (2) surrounded by upstanding first (4) and second (6) sidewall panels which are mutually connected by corner panels (12) forming corner reinforcement (22), wherein each sidewall panel (4, 6) is connected to the bottom panel (2) via a first folding line (3, 5), wherein each corner panel (12) is further connected to a fastening part (8c) provided on the first sidewall panel (4), wherein the fastening part (8c) extends at least partly from a remaining part (8a) of the first sidewall panel (4) in a direction (Ri) towards an interior space (I) of the box (1), such that the fastening part (8c) at least partly stands away from the remaining part (8a) of the first sidewall panel (4), thereby defining a space (20) between the fastening part (8c) and at least the remaining part (8a). The invention further relates to a blank (P) for such a box (1).
