Abstract (en)

[origin: EP2141305A2] A wall anchor (1) is assembled from a tube (3) with an insert (5) which is fixed at an outer end therein and which is provided with an axially protruding hook (9), wherein in projection the hook is present wholly within the outer periphery of the tube. The hook (9) is attached with a first outer end (9a) to the insert at a position close to the outer periphery of the tube and the second outer end (9b) of the hook is situated diametrically opposite. The second outer end (9b) is provided on one side with a perpendicular protrusion (17) which grips under an edge of an anchor eye, and on the other side with a shoulder (19). This protrusion (17) and shoulder remain wholly within the outer periphery of the tube.
