Abstract (en)  
[origin: CA2681600A1] The invention relates to a feed system for arrangement in front of at least one multiple-tier baking oven (104; 204; 304) comprising a plurality of hearths (102; 202; 302). In order to increase the flexibility of a feed system, the invention provides a feed system, which has an extending frame (108; 208; 308) comprising carrier elements (110; 210; 310) for receiving and supporting an extending hearth (112; 212; 312). The feed system according to the invention further has a bakery goods receiving device (114; 214; 314) comprising a bakery goods receiving surface (115; 215; 315), which can be moved for receiving bakery goods disposed on a baking surface relative to the baking surface.
