Abstract (en)
[origin: CA2685110A1] The invention relates to a method for producing modified potato flakes or modified potato granulate. Said method comprises the following steps: a) potatoes are washed; b) the peels and any dirt are removed; c) the potatoes are optionally cut into small pieces; d) the potatoes are optionally blanched; e) the potatoes are optionally cooled if step d) is carried out; f) the potatoes are pressure-cooked; g) the pressure-cooked potatoes are strained or mashed; h) other additives are optionally added as dietary fibers; and i) the obtained puree is dried. Dietary fibers are added in at least one additional step after step b) and before step i) and are mixed in an essentially homogeneous manner into a product obtained at that time of the process. Also disclosed are modified potato flakes or potato granulates produced according to said method as well as the use thereof.
