Abstract (en)  
[origin: WO2008133953A1] A computer station module for a user has a base with wheels for moving the module between locations. A post extends outwardly from the base and a seat supported by the post. A central processing unit connected to the seat. The module is easy to use and transport and is simple to manufacture and assemble. The module is adaptable to be utilized by users who prefer to work multiple tasks that require two monitors to be used simultaneously or if the module is utilized by a left hand user or a right hand user. The module is slidable under a desk or a table of any kind.
